C3

So, im Commit 2 I basically add some add function that can add books and members.

___

but im commit 3, I update Login fun. and also write search and borrow Book function.

Here it is

Login

member
found

Menue

user will Chouse

Borrow

Borrow (mid, index)

Search ()

vector of
index with
Simmilar name

Choose the
book and

lock book ,
Push to Borrow books ad
of member

There are no such problem accured while

writing the logic of code.

Since , we used structure rather than classes

it is more compact and easy to handle.
